

BUILDING THE MOST AI-READY ECONOMY

Helping Indiana Businesses understand, pilot, and scale AI

AI is already reshaping operations, workforce, and competitiveness. Businesses across Indiana, from main street to large businesses, are at different stages of adoption, and that's the opportunity.

Indiana is building the infrastructure to help companies move from awareness to execution, quickly and practically.

Why Now

- AI delivers **14–55% productivity gains** at the task level
- Workers **complete some tasks up to 40% faster** with AI
- Early adopters are building both **capability and talent advantages**

What You Can Do

Explore

Understand where AI fits in your business with a readiness assessment, use cases, AI Playbook.

Engage

Learn from peers and experts at Roadshows, workshops, and peer learning networks.

Execute

Start an AI project with IN AI and connect with trusted implementation or training partners.

AI in Practice

- Manufacturing: reduced downtime and improved maintenance scheduling
- Healthcare: automated administrative workflows to free up staff time for patient care
- Agriculture: yield forecasting and operational planning

What You Get

- Practical, business-focused AI use cases
- Access to university talent teams and technical partners
- Support launching real AI projects
- Pathways to workforce and student talent
- No-cost or low-cost entry points

Move from “AI Curiosity” to “AI in Production” in weeks, not years

IN AI Roadshow

See AI in Action. Connect Locally. Build What's Next.

IN AI Roadshows are interactive sessions across Indiana that connect business leaders to real-world AI applications and clear pathways to execution. Each roadshow is structured to move from knowledge and insights to action in a single session. IN AI Roadshows are built for business and workforce leaders driving solutions and owning organizational outcomes.
